

**SUPER JUMP
INTELLECT-TRAINERS
CREATE THE
№1 COMPANY
IN THE WORLD**

English translation by

Intellect-trainer

Paul Ramsey

Preface

This book is created by the best Intellect-coaches of Super Jump, especially for the new Intellect-coaches.

Purposes of the book:

1. To transmit to new Intellect-coaches the vision and strategy of making the Super Jump company the first-place company in the world on capitalization and respect.
2. To increase the confidence in new Intellect-coaches of the fact that they make up the most important, most necessary, honest, useful, and greatest matter on the earth.
3. To arm the new Intellect-coach of Super Jump with the “tools” for the rapid and effective creation of a team of hundred-million devoted and respected Intellect-coaches.
4. To show the entire world our plan of rescuing humanity from self-destruction and to invite into our team, our family, and into the company of Super Jump, all people, who dream about greatness, heritage, wealth, and glory.

Chapter 9

Partner Program Of Super Jump 120

Chapter 10

As To Pass Apple, Microsoft, And Google 137

Chapter 1

WHO SUCH INTELLECT-COACHES

Friends, let us take a microscope and attentively study it, that itself represents the new world popular profession of the “Super Jump Intellect-coach”.

For understanding the significance and scale of this new profession. Let us attentively examine it from four sides, through four prisms: leadership, entrepreneurship, pedagogy, and psychology.

The Intellect-coaches of Super Jump - these are ambitious, industrious, realized, bright, thinking people, united around the general Super-purpose - to save humanity from self-destruction, to save the ecosystem of the earth, and to help billions of people, which suffer from mental problems, the absence of energy and sense of life.

You will agree, the usual leader, entrepreneur, teacher, or psychologist will not be able to save humanity and to help

billions of people, for these are necessary and large ambitions, great powers, the knowledge of large scale, charisma, and skills to convince and to influence people.

The profession “Intellect-coach of Super Jump” is harmoniously connected to itself of increasing the best of four existing professions: leader, entrepreneur, teacher, and psychologist. And add to this understanding to save humanity, to help billions of people, to earn a lot of money, to leave a bright track in history. Therefore it is possible to boldly say that the Intellect-coach of Super Jump - is: leader is 2.0 + entrepreneur 2.0 + teacher 2.0 + psychologist of 2.0

But now let us compare the profession of Intellet-coach of SJ with each of these four professions.

THE INTELLECT-COACH OF SJ - THIS IS
THE LEADER OF 2.0

The one who yet did not study in practice and did not try on itself the effectiveness of the procedure of Super Jump, can with a smile say: “Why Intellect-coaches (IT) – these leaders of 2.0? Prove your assertion. How the leadership of the Intellect-coaches of SJ differs from usual leaders?”

Now we will prove to you that the IT - these are leader-giants, these are super-leaders, these are leaders of 2.0.

Having first, become the Intellect-coach of SJ, the usual person, using our partner program, “with a team of three billion friends”, can create a team of three billion partners and save humanity from moved ecocatastrophe. Show me a leader, capable of combining and bringing to itself 3,000,000,000 partners to the united purpose. There are no such leaders besides the IT on earth. This is why the Intellect-coach of Super Jump - is a leader of 2.0.

In the second place, in Intellect-coaches, the largest scale of the purpose - to save humanity from self-destruction, to save the ecosystem of the earth, to help billions of good

people to be freed from the mental sufferings, a chronic absence of energy, and sense of life.

Show me still leaders with such scale, greatest, supernatural purposes. In the usual leaders, this scale of purpose is a considerably smaller prize.

As Mark Aurelius spoke: “Man stands as much, as the value of the matter, about which it worries”. This is why the Intellect-coaches of SJ – are the leaders of 2.0.

THE INTELLECT-COACH OF SJ - THIS IS ENTREPRENEUR 2.0

Now we prove, why IT - this the highest-rising entrepreneur in the world.

It is no secret that today, the business must put in billions of dollars to earn billions of dollars. But the majority of people do not have much money.

It turns out that the entrance to the club of billionaires is closed to ordinary people. But after becoming the Intellect-coach of SJ, the usual person (taxi driver, teacher, doctor, student, pensioner, networker) of any age, making a good, honest, useful matter can become a millionaire and even billionaire.

It is also necessary to note that in contrast to the usual entrepreneurs, the Intellect-coaches understand, that to earn properly a lot of money – is necessary to create something new, that was not in existence before. This is why Intellect-coach created the new industry of Super Jump.

The IT does not spend time, energy, and money on the competition, they direct all resources to reach the Super-purpose of Super Jump.

Well, the main thing - Intellect-coaches do not work solely for money. Money for the IT is only a tool for reaching Super-purpose - to save humanity from self-destruction.

If it turns out that Intellect-coaches earn million and billion, not they compete with others, makes a good, big deal, because they help billions of people without investing in this a lot of money.

This is why Intellect-coaches - are the greatest entrepreneurs 2.0.

THE INTELLECT-COACH OF SJ - THIS IS
A TEACHER OF 2.0

To the Intellect-coaches of Super Jump on the earth lived the great teacher-giants, on arms of which stands our civilization: Johann Heinrich Pestalotstsi, Mary Montessori, Anton Makarenko, Vasiliy Sukhomlinskiy and other creators of pedagogy. They dedicated their genius and life to children and to adolescents, and today pedagogical aids are very necessary for billions of adults.

Billions of adults fell into trouble: their customary peace collapses, they lose fulcrums, psychological loads beyond

the limits, solitude, and chronic fatigue, the majority occurred the loss of the sense of life and customary benchmarks.

You will agree, support is necessary for today's adults as air, and external corset is necessary for them, they should learn to live in the new, turbulent world of constant changes.

This is why the Intellect-coaches of SJ created "adult pedagogy", pedagogy for adults.

A new online university for the instruction of adults is called "The Intellect-club of Super Jump." And this is not simply a theory or an idea, but they are already an existing business, an existing educational methodology. Already today we render aid to adults in 72 countries, in 25 languages.

A beginning of a large increase in the team of the Intellect-coaches of SJ, since pedagogical aid is necessary for billions of adults as air, then a quantity IT needs to grow at a high rate.

The team of Super Jump placed before itself a critical goal in 2023 - to create one hundred million new Intellect-coaches of SJ.

Usually, teachers help several tens or hundreds of children, and after achieving it, do without obtaining proper appreciation and encouragement.

But Intellect-coaches, reporting their knowledge, wisdom, councils, and love on the pedagogical chain, help millions and billions of adults, earning in this case receive worthy amounts of money, and obtaining appreciation, respect, and glory.

This is why Intellect-coaches - this mega-teacher, super-enlighteners, teachers of 2.0.

INTELLECT-COACH - THIS IS A PSYCHOLOGIST OF 2.0

Now we prove why Intellect-coach - this is a new, more effective psychologist of 2.0.

If you yourselves have not tested the effectiveness of the procedure of Super Jump, then we will not be able to explain to you in words entirely its power, beauty, and force. To you, it remains to only believe my words, and it is better by itself to approve Super Jump on itself.

Thus, the advantages of the profession “Intellect-coach” above the usual psychologists mass, let us give you several of them.

First, the Intellect-coaches of SJ are considerably more rapid, they more cheaply and more effectively help people. In the second place, classical psychologists earn money only if their clients suffer and come to them for infinite

sessions. If the client's "old school" gets better, then the psychologist remains without the money.

Thirdly, for unhappy psychologists, entire days must consume negative emotions and metaphysical poison, which leads to the fact that they regularly burn out, suffer, and forced themselves to walk to the sessions to its already psychologists and leave them their earned money. And so this process is repeated.

The strategy of Intellect-coaches is principally different: during the intellect training we develop in the people the level of happiness, and positive energy, we strengthen their mental health and we increase their competitive ability.

Charging students with positive energy, Intellect-coaches themselves are charged with positive, energy and still more cheerfulness.

The more psychologists work with their clients, the forces and energy in them lessen. But in Intellect-coaches vice versa is true - the more Intellect-coaches charge by the

energy of students, the more energy and states of happiness are obtained. We are confident, that sometimes in civilized countries at the most popular TV show, we will conduct open and honest competitions with classical psychologists.

We will invite into the studio 20 randomly selected persons, who suffer from mental diseases. With the aid of the live draw, one against the clients will take classical psychologist, and one other the Intellect-coach of SJ. In 10 days all will again be encountered in the studio, and all subjects will describe their results.

I am absolutely confident, all spectators will see how many times the procedure of the Super Jump is more effective than all old procedures.

What is still important - for the clients of Super Jump the aid bypasses considerably cheaper.

So that the representatives would not give old school to us to the court, we officially declare: the Intellect-coaches of Super Jump do not treat depression and other mental illnesses! In our intellect training, we help people in the development of their personality, level of happiness, positive mentality, and energy. Tested on ourselves the procedure and results, which you will obtain one hundred times more loudly than will sound more than thousands of my words. This is why Intellect-coaches - are the most honest and most effective psychologists of 2.0.

THE CONCLUSION

The profession of the “Intellect-coach of Super Jump” – is the rising and most important profession in the world, because the IT solves the most important and greatest problems on the earth.

If we take the best habits and knowledge of four known to you professions (leader, entrepreneur, teacher, and psychologist), accumulate them together, and multiply them

by two, then we will obtain the new, claimed profession:
“The Intellect-coach of Super Jump”.

The leader is 2.0 + entrepreneur 2.0 + teacher 2.0 +
psychologist 2.0 = Intellect-coach of Super Jump.

Chapter 2

PURCHASE MORE THAN GOODS, ACCUMULATE MORE THAN THE MONEY

Against the background of the rapid development of science and new technologies, we observe the process of degradation and destruction of humanity. Clever people understand, that peace took the epidemic of frenzy and ignorance.

Ignorance - this is the weak intellectual development of man. But the weak intellectual development of the majority of people is the main reason for the destruction of the ecosystem of the earth, wars, mental, and mental suffering, addiction, alcoholism, hatred, and malice.

As Socrates spoke: "In the world is only one good - knowledge, and only one evil - ignorance".

It is obvious that today humanity is mental and is intellectual. To save our peace, we must study the history of this illness and understand when and which occurred to us. Let us return to history and let us look at when we as form, drove ourselves into the framework of the food chain and practically they became social robots.

The majority of people live by decades according to the formula: “I awoke, I wrote, I breakfast, I went to work, I worked, I had a nap, and died”.

Very accurately noticed Steve Wozniak, the co-founder of the Apple company:

“When we with Steve Jobs created Apple, we dreamed and believed in the fact that personal computers will take upon much of people’s work, and the people will have more free time for the family, sport, self-development, leisure, training children, but what came out of everything was the opposite. When I was small, our family worked only with the father. This money was sufficient for a decent house, automobile,

good food, and journeys. During the weekend we rested with the entire family. Mom did not work, but she was occupied with the house and our education. But now the majority of people live with a terrible deficit of time and money.

Today, as a rule, both husband and wife are working. But this money for them is not sufficient, and for them, it is necessary to work on the weekend. Parents have considerably less give to time to educate children. Yes even to itself the time is not sufficient.”

Let’s attempt to understand when humanity rolled up to the curved road of torture and suffering.

Our planetary tragedy began in the early 20th century. Henry Ford launched the mass production of automobiles. Hundreds of talented energetic entrepreneurs copied his business idea, and at some moment producers released so many new cars, that their sales practically stopped.

Add to this one additional important fact - at that time the producers tried to let out quality goods so that they would serve as long as possible.

Buyers then still had a head on their arms and discussed as follows: why should I buy a new car, if my wonderful old car works? The question of the survival of business came up before the producers of automobiles. Investors put up enormous amounts of money, and not to simply shut plants, or to lose billions, and discharge millions of working people.

To their aid, brilliant advertisers and marketers arrived. They proposed a simple and effective solution - it is necessary with the aid of the advertisement to create in the owners of old automobiles a feeling of inferiority, and thus to force them to purchase a new car.

At this historical moment, humanity was carried along the curved road of suffering and destruction of the ecosystem of the earth.

With each year the producers increasingly put money into advertisements, and they became more experienced and effective. The producers of automobiles understood: so that their business would be developed and profits grew, they must let out each year new models, with the aid of the sly advertising that it is necessary to, even more, to degrade the owners of old automobiles, to make them in the eyes of a society that they are losers and unlucky people, to force them to eject and dump automobiles that are still working and to buy new.

Great tragedy thus began. The producers of automobiles no longer attempted to build quality and reliable automobiles, the priority became marketing clips, and no tendency toward reduction in the price, or increase in efficiency and reliability of the automobile. You will recall old American films. Heroes drive luxurious automobiles with wings, chrome-plated and unnecessary elements, and it is understandable why...to invent a new economical and reliable automobile. It is necessary to spend years and

billions of dollars to change the external type of automobile. It suffices to only fit the chrome-plated wings, to color in another color, and to change the form of the body.

The idea to suggest to the owners of old goods a feeling of inferiority joyfully caught the producers of clothing, everyday goods, cosmeticians, perfumeries, and furniture. It is shorter, in all, that it is possible to sell to users. From this point on, the mossiness mushroom of frenzy began to untwist with enormous force. People are no longer interested in real benefits, and the reliability of goods. All harmony began to play into the game of the destruction of peace “who steep slope.”

The apogee of this frenzy happened in 1979. Almost no one will today recall this history, but it very well demonstrates the final death of common sense. Iranian Shah ordered the company of Mercedes automobiles to build cars for his army.

On the technical specification, the roof of the sedan had to be sufficiently high that the servicemen could move in the automobile at their peak heights. Automobiles had to be maximally passable and durable. And when the company of Mercedes approached the mass production of Gelendvagenov, a revolution occurred in Iran. They overthrew the Shah and the country no longer could buy these military automobiles.

The corporation of Mercedes despondency reigned. To whom to sell these expensive, heavy, voracious military jeeps, calculated in the servicemen, impassable road and desert!? In Europe, on the road, it is complicated to find puddles, but there is no desert there. But since the automobiles were produced, the company was nowhere, and they advanced them to the auto shows.

After the start of sales, all marketers were very deeply astonished. This expensive military automobile began to enjoy rabid popularity. This case demonstrates, that the buyers at this time already completely lost common sense.

In Gelendvagen square form, which means poor aerodynamics, and high air resistance leads to the large consumption of fuel. All-drive wheels and complex suspension are calculated in the desert and also increase fuel consumption. Plus - high price.

It would seem, all these facts had to repel buyers from the acquisition by Gelendvagenov, but with logicians and common sense, no one was interested.

The same occurs in the production of clothing, furniture, and cosmetics. Each month producers let out the next new, stunning collection, and spend a huge amount of money on advertisement to make it maximally painful to those, who are “trying” the collection; to force them to throw out the still working quality things and to purchase new, contemporary unreasonable excess.

You will look as they changed the purpose of the producers:

-Before “the epidemics of frenzy” the purpose of producers was to create maximally reliable goods so that they would serve several generations. Such a strategy is economical, honest, and preserves the ecosystem.

-After “the epidemic of frenzy” the purpose of producers became as most frequently possible a commodity number, to devise as many as possible marketing clips to take out as much as possible money from the user. Today they spit the quality. Good quality harms their incomes since a buyer who takes a long time will use goods and soon will not purchase new ones.

At this tragic moment, the life of the majority of the unconscious people became a rat race. But, our civilization finally descended from the mind, it became civilized, which generates mountains of garbage, toxic air, and water.

The consequences of “the epidemic of frenzy” is terrifying - the constantly growing production every minute kills the

ecosystem and poisons water and air. The planet chokes with garbage and ejections of carbon dioxide.

Let's estimate the scale of the frenzy:

- Each year more than \$500 billion are spent on advertising, and given for all children on the earth have free elementary education is only \$27 billion.
- According to the data from the UN each day 27,000 men die of hunger. To save these unhappy people and to free peace from hunger it is necessary only \$50 billion. This is less than 10% of the world's advertising budget.

As we see, 100 years ago the producers of goods opened Pandora's box and released from it envy, stupidity, non-realization, and greed. The effect of the advertisement campaign proved to be so strong that the advertisement itself already enslaved the minds of billions of people.

The consequence of this illness – is degradation, alcoholism, addiction, mental illnesses, and the senselessness of existence of many people.

The idea of “purchase more goods, accumulate more money” became simultaneously the main moving force of the development of technologies, the economy, and the killer of humanity.

The idea of “purchasing more goods” has made people unhappy and it is one of the reasons for the mental suffering of billions of people. It is possible to boldly name this idea as a dual killer. Indeed it simultaneously kills the ecosystem of the earth and the souls of people. For themselves, billions of people imperceptibly became the slaves of advertisements and false values.

To stop this frenzy, the self-destruction of humanity, only the Intellect-coaches of Super Jump can do this. How this is possible to make? It is very simple.

It is necessary to replace the destructive, harmful idea “purchase more goods, accumulate more money” with new creative, useful ideas “develop each day your personality, intellect, realization, and wisdom! Obtain from this development a gigantic quantity of happiness, happiness, and energy!”

The Intellect-coaches of Super Jump has proved in practice thousands of times that through the daily process of the development of personality, intellect, and positive mentality our life is filled with happiness, great sense, and energy. The process of the daily development of one’s personality is one of the most important senses of the life of man.

In its tendency to destroy the ecosystem of the earth, humanity approached the very edge of the black precipice of self-destruction. The cascade process of death will begin, and saving our civilization will be impossible. Therefore we no longer can afford further to continue to play into the game “purchase more goods and throw out them to the dump”.

Each minute on earth 27 soccer fields of trees are destroyed and it emits a gigantic quantity of poison, harmful substances, toxic air, and water.

But we cannot one day stop the large part of the plants and factories. Millions of people will be without work, and Armageddon will begin on earth. But how are we to be? We have only one output...

As you know, the Fourth industrial revolution now occurs. Its drivers are robots, nanotechnology, artificial intelligence, and quantum computers. But it will not help to solve problems with the ecosystem of the earth.

Therefore saving our lives is, obviously, necessary for the Fifth intellectual revolution, directed toward the development of man.

Today the development of technologies around the world put in trillions of dollars, and in the development of man - almost zero.

To save our civilization, the Intellect-coaches of Super Jump created a new industry, a new market, a new economy for strengthening mental human health, development of intellect, and personal battery charging. This will allow billions of people to jump off the needle of reckless consumption and direct their energy and time toward the intellectual, mental, and moral development of man.

Recently we witnessed a mass trend in the discoveries of fitness clubs around the world. Today we observe the gigantic speed of the discovery of the online intellect clubs of Super Jump.

Each day the new profession of the “Intellect-coach of Super Jump” master thousands of bright, clever, noble people around the world. And this is only the beginning!

Chapter 3

SUPER-PURPOSE OF SUPER JUMP

Each person has only one priceless life, and only it decides in that or in whom it invests. There are two levels of the states: the high state of life and the low.

The low state of life is determined by the small purposes: to purchase an apartment, machine, telephone, gold necklace, to rest at sea, to eat in a restaurant, to construct a home, etc.

The majority of people are born giants, but in the course of their life the gray, unconscious majority begins to tie with its small, negligible purposes.

Lightly corroded purposes do not make it possible for a man to be himself, like a giant. Small purposes - these are the curved mirrors, looking into which the giant sees itself. Small purposes steal in man the bright happy great life,

filled with love, and wealth, greatness by creation, development, and by happiness.

For the person himself, small purposes imperceptible convert his priceless life to run in the circle, into the rat race.

You did see, a small hamster or squirrel rapidly run inside the wheel? It runs very rapidly, but it stands still and runs - this is the only illusion of motion. In the process of running the hamster forgets about the fact that it lives in the cage.

Small purposes convert godly life into the dull, sad, wheel of routines: I awoke, I wrote, I was washed, I ate breakfast, went to work, had a nap, and died...

Small purposes - large human tragedy, which steals the people to have a bright, interesting, great life.

Distinguished scientist, writer, and doctor-psychiatrist Victor Frankl dedicated their life in order scientifically to prove the

importance of the scale of purposes, and sense of life for each person. We, Intellect-coaches, are enraptured by Victor Frankl and are grateful to him for his important scientific heritage.

Before the Second World War, Victor Frankl was a successful doctor, scientist, and original discoverer. In it, there was the large, gigantic purpose - to understand the reasons for alcoholism, addiction, and mental suffering and to save millions of unhappy people.

But terrible fascism took Europe. One of mad Hitler's purposes was the destruction of Jews.

Friends from America proposed to Victor Frankl with his wife to move to the USA. But at the last moment to his parents, did not get a visa, and Victor Frankl decided to face his pain and sufferings with his favorite parents. Subsequently, his parents and wife were killed in the concentration camp. Scientists themselves passed, perhaps suffering all circles of hell.

Frankl survived four camps of death, hunger, cold, and beatings, but he was not discouraged. Each day, being located on the face of life and death, the distinguished scientist continued his scientific labor. Naturally, he did not have paper or an arm; therefore he fixed all his transactions in his mind and imagination.

Each day up at sunrise, when together with other prisoners they were expelled to hard labor works, Victor Frankl continued to reflect, to search for answers to the crucial issues: “Why are the people voluntarily killing themselves by narcotics or alcohol? Indeed each drug addict and dipsomaniac understands, that he kills himself. Why did they make this? What moves them? Why people do suffer from mental suffering? ...“

Despite all circles of hell, as a scientist, he continued to serve humanity. He mentally saved millions of lives. Victor Frankl was not a locked introvert, even being located at the bottom of hell, he continued to help people.

Already he intuitively understood, that the problem of alcoholism, addiction, and psychological, and mental suffering in the absence of a sense of life.

Once, his comrade on the misfortune said to him: “I no longer want to live”. How to help this person? Victor in the conversation with this comrade learns, that before the concentration camp, he was a historian and he did not finish his main book. “Here you see”, said Frankl: “You still have an incomplete mission on the earth; therefore for you, there is something to live for!”

Most likely the precisely large purpose of Victor Frankl helped him to survive. After the end of the war and the release of Frankl's from the concentration camp with an even larger passion, studied science.

Today, because of it, we know that 95% of dipsomaniacs and drug addicts kill themselves with alcohol and narcotics because they do not have a large purpose (sense of life).

When new students, get tired from life and are lost comes to our intellect training, besides the fact that we with train and develop their level of happiness, energy, intellect, and competitive ability on the 8th day of our course of Super Jump we request it to select for ourselves Super-purpose. Because without a large purpose, one cannot live a bright, interesting, saturated, and great life.

So naturally, the first one hundred Intellect-coaches of SJ in practice concluded that today's most important purpose - is to save the ecosystem of the earth from destruction and to save all of mankind, all children and grandchildren from self-destruction.

The majority of people, despite the loud calls of scientists, now, cannot realize the approaching fatal danger for the entire humanity. Therefore, it seems that global warming and the cascade destruction of ecosystems are still fairy tales, devised by romantics.

“Indeed when I go to the street, I see that the coldest winter that came in recent years, it means scientists will lie?! There is no global warming! There is no ecocatastrophe!”

This is not so! Entire the fact is that we perceive the weather today, but we do not perceive its mean temperature in the year or for 10 years. But contemporary scientific instruments, satellites, Super Computers with absolute accuracy show, only in the last 10 years the number of packages on the earth, where the temperature exceeded 50 degrees Celsius grew 2 times, and several times, when the temperature rose above 50 degrees also it grew 2 times.

We, as form, are cost on the edge of the precipice of self-destruction. It is earlier to convince people of the being approached danger, we gave ten scientific facts and specific numbers, but people of this do not understand, they do not hear, and do not feel. Today we will try to knock hard with the aid of emotions and feelings.

Give let us represent the ecosystem of the earth - this is a living organism, these are you. Cliffs, stones - these are your bones. Soil - is your muscles. Rivers - these are your veins. Water - is your blood, and trees - are your lungs. People - are the small parasites, that live on your body. Their purpose – is to destroy you, to make you it is painful. Thus far person-parasites on your body was little, you did not note them, but lately, they began to multiply at the high speed. There were 200,000 of them, and now 8,000,000,000 and they constantly devour your lungs.

From birth, you had two lungs (6 trillion trees), but these person-parasites would already destroy one of your lungs (3 trillion trees). To stop and to understand the simple truth - after killing you, they also will die, because in cold, infinite space there is no second planet for them!

Still yesterday you hoped that the person-parasites will understand that by killing you they kill themselves, but today you see that, drawing near your death, they will not stop you to kill. On the contrary, they with an even larger

speed cut out your lungs. Each minute they destroy 27 soccer fields in forests.

They kill you from two sides. On the one hand - shred your lungs, and on the other - they eject a gigantic quantity of carbon dioxide (CO₂). Parasites, as if, present to you in the head plastic packet, pump from its oxygen, and they pump into it carbon dioxide, and you already choke.

But this is only one-tenth part of your tortures.

Person-parasites, destroy trees, bare your body, and the fiery sun begins to burn your skin. You will recall as on a hot day it was painful to be located under the burning sun, even through the clothing it was burning your skin. You will recall, as you hid from the sun under the tree because of the shadow of the tree, it was cool and it is good.

So our earth of thousands of years is hidden in the cool shadow of its trees of the annealing solar rays. But now

person-parasites destroyed already more than half of the trees, and the sun with enormous force heats the earth.

A hot day, dinner, sun anneal your skin, and nowhere for you to hide. Person-parasites destroyed your outer clothing, and now your skin burns, and bursts itself. It has already been covered with blisters, but to person-parasites, it is not pathetic.

You attempt through the scientist to explain that soon you will die, and those, who kill, will also die, but person-parasites are so weakly intellectually developed that they cannot understand this simple relationship.

You attempt to explain that your body of person-parasites already has you incandesced to the limit. That soon from the high temperature will burn grass, and all harvests of wheat, corn, and rice will burn. Soon person-parasites will be nothing. Everyone will die from hunger, and after several years the supermarkets will be empty.

You entreat them to cease to kill you, but they are so foolish that you do not understand, they do not hear, and they continue to torture you.

But what is the reason for the self-destruction of humanity? Why do people each day, take a pistol and shoot themselves first in the foot, then into the hand, and do not understand, that soon their bodies will die?

As Socrates said: “In the world is only one good - knowledge, and one evil alone - ignorance”. Ignorance can be deciphered as: “they do not know, that they create”.

As if an old grandmother, looking at the consequences of dementia, the ignorance of people sourly sighs and speaks: “Oh, forgive them, Lord. Since they do not know, that they create.” To the fatal point, person-parasites remained for only 5-6 years and then ends terribly.

To save all your favorite, native and your dear people, it is directly now necessary to understand, why good people

become “person-parasites”? What must be done, to save our peace? And who can make this?

Before describing to you the plan of the Intellect-coach in SJ on rescuing humanity from destruction, we want to describe to you who devised and selected our Super-purpose of Super Jump.

Our planetary team of Intellect-coaches - they are family, associates, brothers, the elite intellectual club, the thinking, aware people, in which there are no bosses, Board of Directors, or some great gurus.

We are all Intellect-coaches; we are all equal among the equal. Strategy and the tactics of new industry naturally manufacture those leading the top the leaders of Super Jump. How to become the chief top leader of SJ?

It is necessary to simply create, to teach, as many as possible new Intellect-coaches. The authority of our leaders is conquered. You will agree, this is clever and is just.

Let's represent that two Intellect-coaches voice the different points of sight to strategy or tactics of the development of our new industry. The first Intellect-coach taught and prepared 25,000 of the new Intellect-coaches of SJ. His income - millions of dollars. But the second Intellect-coach prepared only 5 new IT. Whose opinion you will be more useful and more reliable? Certainly, the first IT!

When we say that we are a team of equals among equals, in someone can arise one additional crucial issue: "If I am not agreeable with the tactics and vision of my mentor, what do I make?"

Well, this is wonderful! You will pass your mentor in income, RANKS, and already the mentor will learn from you. Become the first to earn income and several new Intellect-coaches in your team, and all Intellect-coaches of the planet will learn from you.

But in the manner that each thinking Intellect-coach searches for its team of people that are more talented, charismatic, clever, and stronger than themselves, then, naturally, it will appear the useful rivalry of new ideas, procedures, and approaches to the development of the business of Super Jump.

After explaining to you, as the start of the main strategic solutions in our planetary team of Super Jump, they become more confident, they become clearer, as the chief of Intellect-coaches of the different countries, continents, and cultures arrive at the united Super-purpose of Super Jump - to save the ecosystem of the earth, to save humanity from the self-destruction.

To us, the fairytale is transported, because the Super-purpose of SJ possesses two enormous forces.

FIRST FORCE

The super-purpose of SJ is the strongest energy source and pedagogical method for the development of each student.

The super-purpose of SJ in a very short time takes the sense of the life of man into the higher state that was lost.

The super-purpose of SJ instantly converts the pawn into the king.

The super-purpose of SJ very rapidly converts one into a giant, a winner.

I can write still many glorifying Super-purpose epithets and images, but the most reliable method - this to verify the force, and energy of Super-purpose on itself.

SECOND FORCE

Super-purpose of SJ - this is the only idea platform, capable of combining the quarreling countries, peoples, corporations, and races around a common purpose.

Today our civilization is very similar to the sinking Titanic, in which people instead of combining efforts and saving the sinking ship fought for the decks and cabins.

So it is desirable to shout: “Idiots, are you more than decks and cabins on a sinking ship?”. So it is desirable to shout, “you will stop! Come! Indeed soon we all will be in the icy water, let us freeze and will die!” But no one hears.

Instead of stopping wars and directing all resources toward rescuing the ecosystem of the earth (sinking ship), people continue to war, to kill, to destroy, and to hate.

PLAN THE OF INTELLECT-COACHES OF SUPER JUMP FOR RESCUING OF HUMANITY

But now let us examine the Plan of the Intellect-coach is to rescue the ecosystem of the earth and entire humanity from self-destruction.

STEP № 1

It will be sufficient to fight against the consequences, it is necessary to remove the reasons for catastrophe. To cure disease, it is necessary to understand its reasons.

Why we do chop the bough, on which we sit? Why in the history of humanity – this is the history of wars? Why instead of creation, instead of prosperity, love, and happiness we fill the earth with hatred, malice, death, and destruction of all facts that to us are dear. After understanding the reasons for self-destruction, we will find medicine.

STEP № 2

The very main reason for the destruction of the ecosystem of the earth is war and mental suffering this is the weak intellectual development of the majority of people.

Two and a half thousand years ago it was understood by the great genius Socrates: “In the world, there is only one evil - this is ignorance, and is one good - this is knowledge”.

Let's understand how weak intellectual development (ignorance) kills the ecosystem of the earth and destroys everything dear to us.

Look at the small children, whose parents left some houses without care. The children have weak intellectual development. Kiddies found matches and it is interesting to them, and as they catch fire, they hiss, and they shine. The children begin to play with the matches. Randomly igniting blinds, the house catches fire, and children die.

You will pay attention, that the majority of adults on the earth behave like small children. They destroy the ecosystem of the earth without understanding, and by this, they kill themselves, their children, their grandchildren, and all of mankind.

Thus, we understood the reason for ecocatastrophe - this is ignorance and the weak intellectual development of the majority of people.

STEP № 3

Fortunately, the weak intellectual development of the majority - this is not an incurable disease, this is the only not developed intellect.

When people want to develop the muscles of their body, they search for fitness-coach, which are working in fitness clubs. The same occurs with the development of intellect, it is necessary to find on the Internet a pleasant Intellect-

coach, to be written down in the online intellect club of Super Jump is sufficient to rapidly pump through its intellect, realization, power engineering, and level of happiness, and at the same time also competitive ability.

Thus, we understood that ignorance is possible “to cure”, intellectual lack of development can be removed in the intellect clubs Super Jump.

STEP № 4

But to most people, to develop them is intellectually and morally insufficient. To save the ecosystem of the earth cannot be taken so simply and stopped by all plants and factories. Otherwise, on the following day, billions of hungry people will leave the streets and will begin Armageddon. It means, that it is necessary for new workplaces and new industries.

Therefore, the Intellect-coaches of SJ created are not simply a network of online intellect clubs, we present a new

industry, new market, new business trend, new economy, and new workplaces for peace. Why this is important?

Peace today took the idea “purchase more goods, accumulate more money”, if earlier the purpose of all producers was the production of maximally qualitative goods, which would serve maximally for long, even several generations of users, then the purpose of all producers - to take out of the client, as much money as possible and for this is harmful to produce the qualitative for long played goods. Importantly each year, each season it is to devise what nibbed marketing clip, to change color, the form of goods so that the people would as fast as possible eject on the dumps the recently purchased useful and working goods.

From the point of view of civilization, the planet chokes with the gigantic mountains of the rejected still working goods.

We - the society, which does not produce happiness, but produces garbage, poison the air, which our children

breathe, we poison water, which our parents drink, we chop the bough on which we sit.

If earlier producers produced qualitative goods and they were proud of quality, they were proud of the fact that their goods served several generations of users, then today the producers would have one purpose - to take out of the users, as much money as possible. By them to spit to the fact that they chop the bough, on which we all sit.

Producers became the slaves of the gold corpuscle. The man already became a social slave, because only a slave to spit, which will be tomorrow. After all, so he does not have a future.

Let's look at our commodity-monetary slavery through the eyes of the user.

Billions of people, being spilled from the morning, go to work, and a large part of the time they give to work. Then, they obtain money for their work, this money buys goods,

and after a short time, they eject it to the dump. In essence, they eject their priceless life to the dump.

We understand the super-consciousness of people, that they work on the dump, and therefore it in every way possible signals to a man that it should change something. But people do not hear their super-consciousness and heart, and, after feeling void inside, people stop this hole in the soul with the next and even more expensive purchase.

How you do think, can this person be a happy and cheerful one that flourishes? Certainly, no! A person originated is stopped up by a giant into the framework of foolish, ineffective commodity-monetary relations.

We escape from the sufferings of man to macroeconomics, to the importance of the creation of the new industry and economy of Super Jump.

As you know, today we live during the Fourth industrial revolution (artificial intelligence, nanotechnology,

blockchain, quantum computers, and other breakthrough technologies). You will pay attention, humanity puts into the development of technologies trillions of dollars per year, and in the development of intellect, the pedagogy of adult - zero!

The Fourth industrial revolution will not be able to stop ecocatastrophe; therefore saving our planet can only be the Intellect-coaches of SJ, after creating the Fifth intellectual revolution.

Intellect-coaches have already launched a viral increase in online intellect clubs of SJ around the world. Very soon on the earth will appear one hundred million new Intellect-coaches. This is sufficient to manage the senses, purposes, and paradigms of the existence of humanity on earth.

Very soon one hundred million Intellect-coaches will present to people the new economy of strengthening mental health, development of emotional intellect, battery

charging, and creation of a new era of peace, prosperity, creation, and happiness.

And since we see the new industry of Super Jump will ensure people new workplaces, it will help with the development of the realization of adults. Very soon the idea of “purchase more goods” will be replaced with the new idea “be a developed intellectual, energetic, and moral, and each day you will obtain from your development an ocean of happiness, joy, and energy! Direct your forces not to the destruction of the ecosystem of the earth, but to the restoration of green forests, clean rivers, and pure excellent air!”

STEP № 5

It is still necessary to answer the crucial issue: “Who will save humanity from self-destruction?” Can be the old professions: politicians, athletes, bankers, artists, and entrepreneurs? The answer is no! Because precisely these

leaders think to treat humanity as a herd of rams, to the precipice.

Fortunately, on the earth was born a new profession, “Intellect-coach of Super Jump”. Intellect-coaches - as if kind of giant, who descended themselves to us from the skies to save our planet. Intellect-coaches, have not only the Super-purpose plan of rescuing humanity, but also necessary procedures, knowledge, experience, and tools.

So that it was that the doctors could make heart surgery, special knowledge, and tools were necessary for them. So that the firemen would save the house from the fire, tools, and special knowledge are also necessary for them. So here too, the new profession of “Intellect-coaches of Super Jump” possess the necessary knowledge, procedures, tools, strategy, and plans to save humanity from self-destruction.

Doctors arrived in order to save our health. Firemen - in order to save our houses from the fire. But the Intellect-

coaches of Super Jump - in order to save humanity from self-destruction, and also to strengthen the mental health of billions of good people!

If you dream about the high state of life, wealth, glory, personal increase, and bright interesting friends, and will be joined by our great legendary star team of the Intellect-coaches of Super Jump.

Chapter 4

IN THAN THE SENSE OF LIFE?

From childhood, we asked the question: “In what sense of life?” And then we did not have a precise answer. On the Internet, there are many lectures and reflections of clever philosophers and thinkers on this theme, but most frequently the essence of their answer to this chief problem is reduced to the idea of – a “sense of life is life itself.”

During intellect-trainings of Super Jump, besides the personal development, strengthening mental health, development of emotional intellect, and battery charging, we train people to be happy, positive, and cheerful.

We accurately know that one of the most important senses of life – is “to be happy!”

After passing a long journey from the darkness and ignorance into the light and realization, we understand as it is arranged in man; therefore we are confident, that the idea

“sense of life is life itself” brings to people enormous harm, and this is why.

In each person in life, there are black strips and unsuccessful times. If in this black period of the time of men, one believes in psychological installation, that “the sense of its life is life itself”, then one will believe the fact that entire life will consist of pain and grief.

After accepting this point of view for the sense of life, and after agreeing with such thoughts, man voluntarily will throw his life into the toilet. And on the contrary, if a man is convinced and believes in the fact that the sense of his life is happiness, then having fallen into the black strip of failures and defeats, one will automatically with all forces will attempt to be pulled out from this black strip.

After being defeated, the person, who selected the psychological installation “I WAS BORN FOR HAPPINESS AND SUCCESS. MY PURPOSE IN LIFE IS TO BE

HAPPY”, they will rapidly find themselves out from the black strip of failures. But a lame duck, that believes in the fact that “the sense of its life is life itself”, itself will convert the temporary black strip into the life, filled with continuous sufferings and pain.

The life of such a lame duck can become a sad anecdote. Encounter somehow two friends from childhood. One is - successful, and the second – is a loser. Successfully asks the loser: “How’s life, brother?” The loser answers: “Everything is bad”. In their life, the black strip began: I fell very ill, I lost my job, my wife threw me out, on the stock exchange I lost all my savings, yesterday I fell into emergency, I broke a hand.” Successful friend sympathized with him, and they radiated. A year passed, and these two friends again randomly encounter. Successful asks: “Regards! Well, how are matters, little brother?” Loser answers: “You remember, I did say you about the black strip in my life? So here, this was not black, but bright purpose.” :)

The theme of the sense of life is very important for each person. We accurately know that from your thoughts, and your adoption of one or the other sense of life your entire future life depends.

Your thoughts - these are the drawings of your future.

Your life - exists as a sum of your thoughts.

Today you are located there, where your yesterday's thoughts brought you, and tomorrow you will be located there, where your today's thoughts will bring you.

Think one hundred times before accepting one or the other sense of life. Selecting one or the other sense of life, you in essence make your main selection in life.

Examining the different senses of life, you as if are situated in the enormous store with the signboard "universe", and before you on the regiments lie the different scenarios of your future: "Pain and poverty", "solitude and grief", "failures and defeat",... and next to lie "wealth and

happiness”, “Love and success”, “happy family and prosperity”, “great life and glory”. Select what you want, and the universe for you has many scenarios for your future.

If in your life you already began a “black strip”, and directly now you assign to yourselves the question: “What to make of it? Where to run? What to do?”, that we have the good answer checked by practice council - in the Internet urgently search for the Intellect-coach of Super Jump. If you urgently buy the starting course of Super Jump (the price is very accessible), then the **WHOLE IN YOU WILL BE WELL!**

Why we are confident in the fact that after Super Jump your life will begin the bright, happy strip? Our confidence rests on our practical experience and the effectiveness of our procedure of Super Jump.

The fact is that the Intellect-coaches of Super Jump are the first in the world on a system basis to begin to develop and train their level of happiness!

When you pass the first starting year of Super Jump, you will be astonished at how easy it is to be a happy and cheerful person.

Development, an increase in your level of happiness is similar to the transformation of the relief of your stomach.

Let us be frank. If a man dreams to pump his press, to make his stomach relief, besides his laziness, no one can prevent him from achieving his goal. In the same manner, only the level of your happiness more easily trains into one against one.

For training the level of happiness you should go into the fitness hall, since Intellect-coaches are online and, believe it, the effects there will be simply immense.

GOOD COUNSEL №1

Dear reader, we want to pay attention to one additional harmful delusion.

People erroneously consider that the sense of life must be one, but this is not so. Reflecting on the sense of life, it is important to understand that for the life several senses of life appear and disappear. They constantly changed from your birth to the present day.

When you were small, to you there were only several days, the sense of your life was reduced to the mother's concern, food, and feeling of safety.

But, after only several years one of the most important senses of life became the knowledge of the surrounding world. You did try everything to the taste, you did attempt to dismantle toys, and you did assign thousands of questions “why? why?”.

But when your age reached sexual maturity, then in you appeared the new sense of life - to find a reliable partner and to leave posterity.

But when the light appeared in the first child, then all previous senses of life left to the second plan. Concern and training of child became the main sense of life.

Unnoticeably your parents aged and appeared one additional sense of life - concern about them.

As we see, many different senses of life appear and disappear during one's life. But, the main thing for them - this to be happy, to fill each instant of their stay on the earth with happiness and by happiness.

GOOD COUNSEL № 2

And one additional good intellect-coaching council: "Do not confuse such different categories as happiness and pleasure."

As a rule, the pleasure of men is obtained through the body: tasty food, massage, walking the in the fresh air, sex, sea, the consumption of those killing the personality of alcohol and cigarettes, and other manipulations with the body.

Pleasure is possibly purchased with money, and happiness cannot be purchased. As Socrates spoke: “By all, it is known that with money it is possible to purchase shoes, but not happiness”.

Happiness cannot be purchased, it is possible to only generate it, to manufacture, to create, each day by attending the intellect clubs of Super Jump.

Happiness - these are metaphysical categories consisting of feelings, emotions, experiences, energy, and thoughts. It is not possible to purchase friendship, love, respect, and happiness, it is possible to only deserve them and to create them.

Pleasure is always limited, you cannot thousands of times in one day eat tasteful meals or thousands of times in the day to delight in sex, but here happiness is infinite!

Attending Intellect-trainings of Super Jump, you actually can become thousands of times happier. This will give you emotions and experiences, which cannot be reached through “primitive, basic pleasures”.

GOOD COUNSEL № 3

We are obligated to you to give one additional very important piece of advice: promoting happiness by reading books and by the survey video is impossible. It is possible to increase only through the daily intellect-trainings of Super Jump.

You can read thousands of books about happiness, and visit thousands of seminars, and webinars, but thus far you will not begin daily to develop the level of happiness, and you will not become happier.

Training the level of happiness resembles training your body. Represent that man set a goal to raise a bar of 200 kg, but instead of persistent heavy training he decided to pump force through the survey of videotapes and reading of the books :) as you think, physical force can be trained, by lying on the sofa and by examining video? Certainly, no!

Only through training, it is possible to pump through the body, accurately also trains, and the level of your happiness, energy, and optimism - only through the intellect-trainings by SJ.

It is applied the results

1. Sense of life - to be happy, to fill each minute of life with happiness and by happiness.

2. In order to be happy, it is necessary to train, to develop your level of happiness, by attending intellect training Super Jump.

3. If you in life do not have happiness, suffer from solitude, chronic fatigue, and loss of fulcrums, then urgently run to the online intellect club of Super Jump!

Chapter 5

PHILOSOPHICAL MAXIM SUPER JUMP

Philosophy - is the science of man, and the main thing in the life of man - this to be happy. As it turns out that philosophy - is the science of the happiness of man.

The cleverest people on earth for thousands of years attempted to understand this happiness as to find as at it to arrive as it to preserve.

We are grateful to the first philosophers, and thinkers for their accomplished work but did not, unfortunately, succeed in creating concrete instructions on reaching happiness. The heritage of Socrates, Plato, Aristotle, Confucius, and other great philosophers has long ago studied humanity, but so it was not able, resting on their thought, to become happier.

Studying their heritage, they did not understand that it is necessary to make in order to be happy. But for us, it is

very important to be happy and for each minute of life to fill with happiness.

Let's read the thoughts of great philosophers about happiness and let's attempt to understand how to find happiness and fill our life with happiness:

- Aristotle

“Happiness - is sense and the designation of life, the sole purpose of human existence”.

- Socrates

“Usual logic asserts: if you are unfortunate, which means, you do not have happiness. But if you do not have one, then go and search for one. However, paradoxical logic says: if you go to search for happiness, then you will lose it! Simply sit down and understand that you have it.”

- Confucius

“Happiness - this is when you understand, large happiness
- this is when you love, the present happiness - this when
you love.”

- Plato

“Happiness is divided into five parts: first, reasonable desires; second, sensible feelings, and the unharmed body; third, success in matters; fourth, good fame among the people; fifth, abundance in money and other means of subsistence. Reasonable desires appear by the consequence of training AND EXPERIENCE.”

We can give still many clever quotations and statements about happiness. Yes, you can easily download from the Internet thousands of great thoughts about happiness, but here is the trouble, all these quotations and thoughts do not draw us nearer. Unfortunately, they do not give us simple clear instructions on “what is to be done to be happy or how to live a happy life.”

However, what do we make, and what is to be done? Fortunately, in the 21st century, the historical scene created new philosophers and thinkers - “the Intellect-coaches of SJ”, they did not simply create the instruction of reaching happiness, they created a new philosophical Maxim: “Person - is a generator of happiness!”

Intellect-coaches in practice have proved that the level of happiness in man is very easily developed as, for example, easily developed the memory of man or his physical force. A new view on happiness in the literal sense translates our peace and places from the head to the feet.

Now to millions of unhappy, lonely, and tired people, it is not necessary to search for happiness, everything is considerably simpler: “Awoke in the morning and before leaving, take ignition keys (“8 exercises of SJ”), include your generator of happiness. Fill it to regional by happiness, by joy, and by energy, and for the entire day generously share your happiness with the people surrounding you.”

But when you are happy, all negative emotions and mental sufferings themselves run away from your life.

Developing, and training each day the level of happiness, you without the fight kick away melancholy, grief, and sincere suffering.

As work, the exercises of Super Jump are very easy to understand based on the example of a dark room. Let us represent those psychological, moral, and mental sufferings - this is dark (how it will be), and your reason, your soul - is a room.

Each morning you are in the black, gloomy room of negative emotions and thoughts and instead of fighting with them, you take the lamp of SJ and ignite bright, good, strong light. And as the black cold dark itself runs away at a rate of three hundred thousand kilometers per second (speed of light).

Clever people know that the black dark – is the only absence of light.

Exercises of Super Jump - the bright, warm, strong lamp, which can help billions of people forever to take leave with mental problems, fears, and complexes.

It would be excellent, if people, after studying the exercises of the procedure of Super Jump, each morning carried them out, would charge themselves with happiness, energy, happiness, but we know that laziness was born earlier than man.

However, what to make of it? What is to be done? The Intellect-coaches of SJ have good medicine for laziness - these are the online Intellect-clubs of Super Jump.

If a man is desirable to train his muscles, he searches for a fitness coach and is written in a fitness club. But if a man wants to train his level of happiness and energy, then he

searches for Intellect-coach and is found in the online-intellect-club of Super Jump.

But which does give a man happiness? This is to be investigated. For this let us represent man, whom each day charges himself with happiness.

This person is ill and does not suffer from mental problems. They have always a lot of energy. It emits happiness and optimism, which means they are pulled by other people, which increases their authority and respect in society. Also, a high level of happiness favorably affects the mental and cognitive abilities, considerably increasing the competitive ability of this person. Plus, happiness, good mood, and smiles prolong their life for an average of 10-15 years.

THE CONCLUSION

Philosophical Maxim of Super Jump: “Person - is a generator of happiness” will save themselves from the

sufferings of millions of good people and it will make our peace better.

Now for people, it is not necessary to suffer, and to spend decades to understand, what is to be done happily. The now sought-for, thinking person from happiness separates several three steps:

- To find pleasant to you the Intellect-coach of SJ!
- To be written down to it into the Intellect-club of Super Jump!
- To use a procedure of Super Jump!

Chapter 6

TRAINING-GREETING TO SUPER JUMP

Let us describe to you the history of birth, perhaps, of the most effective and shortest training in the world.

When Intellect-coaches began to work around the world on all continents, then the customary greetings, such as “good morning”, and “good day” became not urgent. Someone has the morning, someone has the night, and someone has the day. And to the then chief Intellect-coaches of SJ came to mind the brilliant idea - to create the universal firm greeting, which would apply any time and in parallel would be of additional benefit.

More than a week our chief Intellect-coaches of SJ created this masterpiece. In the beginning, they for long selected the four most important and most useful words, and then they created the training greeting.

FIRST WORD - "SUCCESS"

You will agree, dear readers, success plays a key role in the life of man. We know a huge amount of people are industrious, clever, and formed, but by them chronically it does not convey, their life without the success is converted into gray dull torture.

At the same time, there are people, who say: "It was born with the gold spoon in the mouth", such people are not separated by special talents, but by their key advantage - success, fortune, and luck.

Therefore the word SUCCESS occupied an honorary place in our greeting training.

SECOND WORD - "HAPPINESS"

Happiness - this is a central objective in the life of any clever person. Happiness - this is one of the most important senses of life. We live to fill each minute with

happiness. And to generously share happiness with the people surrounding us.

THIRD WORD - “WEALTH”

Wealth makes it possible for a man to be occupied with charity, to help other people, to be financially free, and to delight in life. By the way, in the new industry of Super Jump attaining wealth is ten times easier than in other businesses.

FOURTH WORD - “FRIENDSHIP”

One by one - we are very weak, and together with our friends - we have great power. Only with a team of friends, like-minded people, and allies, it is possible to save humanity from self-destruction and to assemble the company №1 in the world.

In our team of Intellect-coaches, there are no bosses, Board of Directors, who would determine our fate. We are

everything - the Intellect-coaches of Super Jump, partners, equal among the equal.

The realization of the fact that you save peace with real friends, comrades, with partners makes us one hundred times stronger and more confident.

Do you remember, as the 300 Spartans resisted the hundred-thousand army of the Persians? How you do think, why this was possible? Answer to the simple: free, equal allies are many times stronger than slaves.

Each Intellect-coach searches for new partners more strongly, he is more talented. And if it seems new, stronger leader than a tactician, the methods of the development of his mentor are weak and ineffective, then, as any Intellect-coach, can pass his mentor in the income, RANKS, number of partners, and already mentor will learn in this IT, study his experience, strategy, and tactics.

Thus, I present to you the world's masterpiece:

SUCCESS AND FRIENDSHIP WITH US ALWAYS! WEALTH AND HAPPINESS ARE OUR DESTINY!

In the usual companies of greeting colleagues the work they do not make them stronger and it is happier. In our greatest team, each greeting is a lifting rod for the athlete, each greeting makes us stronger, happier, and richer.

I will explain to you the mechanism of the work of our training.

- Words give birth to thoughts.
- Thoughts give birth to behavior.
- Behavior gives birth to habits.
- Habits give birth to destiny.

Since we - the Intellect-coaches of Super Jump, have a mission on the earth - to do everything so that our students will grow rapidly. They achieve large successes, they become healthy and strong, positive and energetic, happy

and competitive; therefore we have maximally utilized the force of words and through them the force of the universe. Let us share with you one additional “secret” leadership training greeting.

As you remember, our team unites the greatest Super-purpose of SJ – to save the ecosystem from destruction, thus saving humanity’s self-destruction. However, to achieve a most complex and most important Super-purpose, we must as fast as possible, pass on the capitalization of Apple, Microsoft, and Google, and become the No 1 company in the world.

For the solution of this problem, our chief top leaders of SJ created special leadership the training-greeting:

WE ARE THE GREATEST IN ALWAYS! AND THE FIRST PLACE IN THE WORLD - OUR DESTINY!

The creation of this training greeting was inspired by the greatest boxer, Mohammed Ali. Each day he said to himself

many times “I am the greatest! I am a king! I am a champion! I the greatest in the light!”

Naturally, many people did laugh, they considered him mad, but, who will recall the names of these small insignificant trolls? Their lot - negligible, insignificant life and eternal oblivion. But here the name of Mohammed Ali will live as much as our civilization will live.

Understand, that if ordinary people hear our leadership greeting, they will laugh, and they will think that we are mad. Well, let them laugh, let so them think so. This is not our, but their problem.

We know that at the beginning of ascending the greatness of man determines not a quantity of money in his pocket, not a quantity of glory and authority, but his purpose, and not a simple purpose, and it calls forward and it motivates a SUPER-PURPOSE - to save our planet!

As soon as the usual person with debts, failures, and defeats with their entire heart and by reason takes the Super-purpose of SJ, in the same instant, they become the greatest legendary hero.

Emperor-philosopher Marcus Aurelius gave the very precision determination of the greatness of a man:

- “The true value of a man is measured by the worth of what he values”

When people hear our Super-purpose of SJ they laugh as small, faceless trolls, and we are not at all disturbed. We recall the popular wisdom: They do not "kick only dead dog", but still we recall one of our favorite parables...

Once Buddha with the students went past the village, in which lived the opponents of Buddhism. Inhabitants poured out of the houses, surrounded them and they began to insult them. The students of Buddha were angered and were ready to give rebuff.

After tarrying, Buddha addressed the crowd, and his speech led to confusion not only for the inhabitants of the village but also students. At first, he turned to the students:

- These people make this matter. They are angered, it seems to them that I - the enemy of their moral abutments. Therefore they insult me, and this is natural. But why are you suddenly angered? Why do you have this reaction? You behaved in a manner that calculated these people and thus allowed them to manipulate you. But once so, you mean they are dependent on them. But perhaps you are not free? People from the village did not also expect this reaction. They became silent. And at the silence Buddha turned to them:

- You everything did say? If you yet did not express yourself, you will have such an opportunity, when we will return.

The confused inhabitants of the village asked:

- But indeed we did insult you, why are you not angered with us?

Buddha answered:

- You - free people, and that you made your right. I do not react to this. Therefore no one and nothing can force me to react in the manner that he wants, no one can influence me and manipulate me. My behavior escapes from my internal state, from my realization. But I would want to present the question to you, which concerns you. In the previous village, the people met me, greeting me with entertainment.

I told them: “Thanks, but we already breakfasted. Take away these fruits and sweets with my blessings to yourselves. We cannot bear them with ourselves because we it is not worn with ourselves food. “And now I ask you: As you think that they made with the fact that I did not accept and returned by them”.

One person in the crowd said:

- It was this way, they took these fruits and sweets away conversely and gave them to their children and families.
- But today I do not take your insults and damnation, said Buddha. I return them to you. However, what will you make of them? Take them away with you and do with them everything that you want.

In contrast to the first “classical” training, the second leadership greeting training is temporary, since soon we will become the No 1 company in the world on capitalization and respect, become an IPO, let us strike peace by the fact we will create one hundred billionaires and millions of millionaires of the teachers the Intellect-coaches of Super Jump.

The entire progressive world will applaud our success and everything from our “classical” training greeting: “Success

and friendship are with us always! Wealth and happiness are our destiny!”

Chapter 7

SHORTEST WAY FROM THE DARK TO THE LIGHT

Let's discover the main secret of the device of the man: positive, happy, cheerful to be considerably more simple, more easily it is more pleasant than sad, lonely, and get tired.

Each practicing Intellect-coach of SJ thousands of times saw the same picture: written in the new group of men many years living in the dark of mental and psychological suffering, lost sense of life, fulcrum, friends, optimism, and hope for a bright future. Naturally, to our procedure of Super Jump, it is disposed extremely skeptically, with distrust and mockery, because the new and unknown always cause distrust. "I - the doctor of psychological sciences says, can you do the new? ", or - "I already many years attend the dearest psychologists, and they cannot free me from mental suffering, and you are not even a psychologist."

But having passed several Intellect-trainings and, even yesterday's pessimist with a black, tired face, as, in the fairy tale, is converted into the happy, laughing sun on legs. And instead of irony, skepticism, and mockery, the Intellect-coach obtains an ocean of appreciation and love.

By the way, about the appreciation, if you have not, then let us uncover for you a small secret – the Intellect-coaches of SJ obtain a very large amount of appreciation in the world because, at the end of each course of Super Jump, practically every student gives enormous deep gratitude and love to the Intellect-coach.

All because he arrived at Super Jump which gets tired, broken, and unhappy, and finished the course happy, energetic, cheerful, with complete optimism and new plans hero.

We know that until you try for yourselves the effectiveness of our procedure of Super Jump, you will not believe our words, because the new and unknown always causes

distrust and skepticism. Let us give several examples of the history of science.

- 70 years were required for the scientific association to recognize the 3 laws of Isaac Newton's physics. Today Newton – is an acknowledged genius, the father of classical physics, and his laws are studied in the school.

- Doctors and scientists considered the charlatan of Louis Pasteur for a period of 16 years until they attempted to prove that the reason for diseases is the microbes, viruses, and pathogens. Today Louis Pasteur is the acknowledged father of microbiology, and his name bears a famous scientific institute in Paris.

- Albert Einstein's ideas were considered erroneous for 15 years, and now they – are the personification of brilliance and intellect.

- The inventors of aircraft the Wright brothers for 5 years appeared with demonstration flights throughout America,

but the editorial staff of the newspaper The New York Times did not send its correspondents, because they were confident, that the apparatus heavier than air cannot fly.

- The first years Sigmund Freud and his followers were considered cheats and charlatans, and now each year the world diplomas of psychologists obtain by 1 to 3 million people. The cost of instruction to a psychologist in the USA stands from \$110,000 to \$500,000, and the authority of psychologists above the fate of people cannot be overestimated.

- In 1970 Richard Bandler with John Grinder created NLP (Neuro-Linguistic Programming). And already Freud's followers considered their cheats and charlatans. But today the regiments of stores are covered with books about NLP, and hundreds of thousands of specialists around the world each day use this procedure.

Understanding as it is arranged peace, the Intellect-coaches of SJ never offend the people, which are called

their cheats, by charlatans, mad, but our procedure of Super Jump is considered complete garbage. Thanks for the fact that although they do not burn on shives :)

We understand, that criticism, insult - this is the normal reaction of ordinary people to things new. Believe that it will pass after a little time, and millions of grateful students will around the world change very rapidly to the majority opinion.

Positive results and the appreciation of students - this is a better medicine for the negative, insults, and skepticism. But the multimillion incomes of Intellect-trainer to SJ will prove the importance and necessity of the fact that we make and will create around the profession “ Intellect-trainer SJ” the halo of respect and glory.

We return to the main freedom of choice of man. Let's talk about why happy is easier than unhappy, and proceed to the mechanism of switching from person the black negative to the bright positive state.

Now I will describe for you - not theory, not an idea, but already routine practices. The Intellect-coaches of SJ thousands of times in practice proved that any person in a very short time can easily leave mental, and psychological suffering and present himself in a state of happiness and happiness. According to the statistics on 1,000 people, Super Jump is a negative opinion. However, the positive results speak thousands of times more loudly than all words of our critics and trolley.

The effect of the rapid switching of your thoughts and feelings from the negative to the positive occurs because your consciousness simultaneously can think and hold in the focus only one thought.

You cannot simultaneously look at loading by energy and negative video, before looking at the negative or positive video, you must select and make a couple of cries to include the player.

Also, without any fight, you can select a positive or negative mood, and concentrate on it as the focus of thoughts and your consciousness and very rapidly you will be filled with light, happiness, and happiness or dark, pain, and grief. The selection is up only to you.

Again we emphasize - it is on no account necessary to fight with negative thoughts, emotions, and feelings, it is simply necessary for the darkroom to include calculation and the dark itself of it will run away :)

This process of the victory of the light above the dark without the fight you practice each day, when at night, entering into the black room, you automatically include light, and in the room, it becomes instantly light.

So that you would simply understand, as your consciousness and super-consciousness work, give together with you let us determine, what physical peace is and what is metaphysical.

Thus, physical peace - peace obeyed the law and obeys the law of physics. In it is such concepts, as it is long, mass, weight, speed, and so on. This peace is objective since scientists can measure one or the other objects.

But, there in the world exist still our emotion, thought, feeling, idea, dream, energy, force of will, and so on. Thus far scientists cannot measure them, although we all know that these categories exist. This peace we see let us name metaphysical (we can give any other determination) you.

After giving precision determination, that there is metaphysical peace, we with you with the aid of our imagination will produce sinking in it, as a submarine is immersed in the ocean, so also we will dive into your metaphysical peace.

You will include imagination and represent your metaphysical peace - this is the enormous palace, in which live different thoughts and feelings. Negative emotions and thoughts you will color by the black paint: these are hatred,

offense, fear, a feeling of injustice, mental suffering, malice, envy, and other negative thoughts, feeling, and emotion.

These essences are always cold, and slippery, smell of rotten meat, and are black in color. They are located in your enormous metaphysical palace from the first and to the recent days of your life.

Fortunately, in your palace even brighter essences live, they are similar to the bright warm suns - these are happiness, happiness, love, confidence, friendship, the force of will, it is kind, harmony, generosity, positive energy, positive thoughts, great bright purposes, dream, and plans.

In the center of your metaphysical palace is located the enormous throne, on which you sit in glory. You - the absolute owner of your internal metaphysical world, only to you to decide come in your palace to isolate the main place: to black poisonous essences or the bright radiant suns.

Everything is light and is simple: when you begin to concentrate your thoughts on the black essences, you no longer see bright solar thoughts, emotion, and feeling; it seems to you that your palace completely was immersed in the dark; and the more you pay attention to black essences, they become greater, the stronger; that they more greatly occupy places in your palace.

And if we do not switch attention to the bright solar thoughts and feelings, then in the course of time your metaphysical palace will become a black, malodorous, terrible prison. But your consciousness will become the prisoner of this cold, terrible prison, and you will be spilled each morning in the environment of black, negative, cold thoughts and feelings. They will be with you the entire day and evening and, believe, they will be to poison entire your life, destroy your health, to suck out your energy. They will slowly and unnoticeably convert your internal world into a black cold swamp.

But, as soon as you will recall that only you are the owner of your internal world, and will switch focus from the negative to the positive thoughts of emotion and feeling, then the present miracle will occur - your metaphysical palace instantly will be filled by solar, warm, good light, and the dark itself will run away from your life. You remember, the dark - the only absence of light.

After understanding once as easily and simply to be a positive, happy, energetic, and cheerful person, arises the just question: why 99% of people constantly do select and do include negative thoughts, feelings, emotions, and information, which does bring to their pain and suffering, does poison their life and does destroy their health? Entire matter in the environment, in the medium, in which the people are situated. Oh, as strongly people underestimate the influence of their environment. Represent that man in the white clothing fell through into the swamp. As he did not try to preserve the cleanliness of his clothing it will not come out, she nevertheless will be soiled by black, linden tree, malodorous wash. So works our environment, living

environment. The majority of us live in the environment of a black, negative metaphysical, information swamp.

But how to be? What to make it? Where to run to? Where after the black, malodorous, poisonous swamp to bathe in the clean, heat, turquoise ocean of happiness, happiness, and optimism?

Perhaps, today on the earth there is only one reliable shelter from the negative - this is the intellect club of Super Jump! Find on the Internet an Intellect-trainer who is pleasant for you, be written down into the group, and be charged by light, wisdom, and solar energy, strengthening your mental health.

If you are an adult, then with probability 95% of you experience mental suffering, psychological overloads, stress, solitude, or chronic fatigue.

It is important to understand, why this does occur and that with you not thus? The entire good, simply surrounding

your world rapidly changes with you, it is destroyed in your eyes and forever it disappears.

Today not only to you but also to billions of adults it is very heavy, they remember, as their grandfathers lived, grandmothers, and parents, yes even themselves large part they lived in another reality and another world, while today we proved to be in the new universe.

Our sufferings are similar to the sufferings of the dolphin, that entire life lived in the sea, and then full gale rejected to the incandescent stones, its skin anneals solar rays, it is sick to it, it is terrible and it is unusual. The same occurs with us, as adults, we remained before, but the peace around us rapidly changed, before our eyes disappear old values and senses.

To adults very complicated to change and to be adapted to the new. Represent the adult, who arrived at the section of gymnastics and it attempts to make stretching next to the five-year-old athletes. This is humpbacked to correct.

This is why our Intellect-clubs of SJ are necessary for billions of adults as air. Without the aid of Intellect-coaches and a new positive medium man practically cannot be been happy, energetic, strong, and competitively capable.

My to you good council - if you have yet did not pass the developing course Super Jump, make to yourselves a tsarist gift, as fast as possible pass it and you will present to yourselves new, bright, interesting, happy life! Everything is in your hands!

Chapter 8

AS TO BECOME RICH, MAKING THE GOOD DEED

We congratulate you, the dear reader, you lucky man, you happy fellow, you proved to be in the right time in the right place. Today very better time to rise from zero, from the debts, from the pit of defeats and failures to the highest tops of success.

Achieve rapidly large success is possible only in the new industry with the new business trend. In the old industries and markets, all bread places already long ago with someone are occupied. And only the birth of the new industry of Super Jump offers ordinary people new infinite possibilities.

In our planetary team, family, the brotherhood of the Intellect-coaches of Super Jump there is an important principle: we everything - partners, we - equal among the equal. But if so, then each Intellect-coach is a strategist, intellectual general, main motivator, and creator of the

hundred-million team of devoted and grateful to it Intellect-coaches around the world.

Even if you never dealt with business, then you will nevertheless easily understand to make the right choice, in order to present new, happy, rich, interesting, bright life to yourself.

- THE FIRST STEP

Wave bye to your old life. If your bank calculates now there are no millions of dollars, then this is a better time to become the Intellect-coach of the Super Jump and to be joined to the most rapidly-growing industry of the Super Jump.

Do not deceive yourself, the matter is not in the crisis, not in the temporary difficulties. As the Indians spoke: “If your horse died, simply sit down on the new horse”.

Let us give an example. All people know about the expensive trademark of Chanel, but almost no one knows that Gabriel Chanel (later it will take the pseudonym of “spinners”) achieved success without looking at the fact that in the shelter, without starting capital, anyone's support. Its main secret is the fact that it never feared to make new, then the fact that others considered it foolish, ridiculous, and not advantageous. Today for you better time very to hear and to accept its good counsel:

“If you want to have that the fact that never they had, for you it is necessary to make that the fact that never they made.”

It is light to say, but it is very difficult to make the right choice of thousand of roads, which today are located before you. The right, clever choice is a guarantee of your success, wealth, and prosperity.

Thus, “old horse did die”, as it is correct to select a new, strong, lucky horse?

- THE SECOND STEP

A very crucial issue with the selection of a new way sounds as follows: “That I can give to people so that they would pay me for this a lot of money?”

To assign this with the form of a simple, but improbably crucial issue is taught by the creator of the network of restaurants of the fast food “KFC” - Colonel Sanders. You for sure already heard its history during the intellect-trainings, but give let us again recall it.

We mentally return at the age of 1950. Let us glance into the small, cheap, dark, cold room, that our hero leases. Looking at it, any person will name his completely unlucky person, the largest loser on the earth.

To him 65 years, a pension of \$95, and a bouquet of diseases. Everything, for which it not was taken in the life, always suffered a crash. It grew without the father, with one

mom. Its mother much worked, and for Sanders was necessary to handle its younger sister.

It dreamed to become an attorney, but money for the instruction it did not have. To obtain a diploma, it was necessary to plow in parallel on several works. And here, the cherished diploma of attorney in its hands. But, at first its matters our hero so is strong, that he fought with his client, for which they forever expelled him from the profession.

Sanders opened with the enormous labor his first servicing, and as soon as it began to bring income, they near constructed a new high-speed highway; therefore people ceased it to be repaired. Later Sanders opens his restaurant and suffers brutal destruction.

And here, our hero, the largest unlucky person in the world, understanding, what cannot be lived to the pension, that very crucial issue assigns to itself: "That I have such, that I can give to people so that they would pay me the money?"

The prescription of the crunching fried hen remained from the ruined restaurant in it. Set to the rusty old pick-up our unlucky person goes around the restaurant after restaurant and attempts to convince owners to use his prescription of hen and to drop from the roll to him royalty (pay for the use of intellectual property). Then there were no cell phones or the Internet; therefore for our hero, it was necessary personally to go around each restaurant.

Everywhere it they sent far further, they laughed above it, they degraded it. And only a thousand sixth restaurants signed with it the first agreement. Well, and further its success story it knows the entire world.

In each developed country, practically in each city, there is a restaurant of fast food by KFC. And at each restaurant hangs the portrait of this likable grandfather in the points and with the beard.

So Colonel Sanders became not only rich and successful but also, perhaps, one of the most learned people in the world.

We will be always grateful to it for the main starting question: “That I can give to people so that the people would pay me for this money?”. Speaking in the modern language: “What problem of people I can solve so that they me for this would pay?”

And today to the team of Intellect-coaches of the Super Jump fairytale it transported, we solve some of the people several most important problems.

FIRST PROBLEM

Today billions of good people suffer from mental diseases, chronic fatigue, solitude, and loss of the sense of life. But we have the unique patented procedure of Super Jump, which is a very rapid, effective, and obtainable price it

saves people from these problems, and raises their level of happiness, confidence, and energy.

OUR SOLUTION

Thus, for billions of people is necessary our product/service. The fact is that the old schools and procedures that aid people with this problem become ineffective since we live in the new, mad, turbulent time of constant changes and overloads. But our procedure creates miracles. On average, of thousands of students, who passed the starting online course of Super Jump, only one is a negative opinion.

If you yourselves tried, they tested our procedure, then you for sure now, reading these lines, widely smile and nod my head.

If yet they did not pass the course Super Jump, then it is mandatory, as fast as possible, they will present themselves with energy, happiness, and pleasure.

VOLUME OF THE NEW MARKET

But now give let us calculate the volume of the new market. 8 billion people in the world today live. A minimum of 2 billion suffer from mental diseases and chronic fatigue.

To load itself with energy, to strengthen mental health, to people it is necessary to regularly attend our online intellect clubs of Super Jump. So, people regularly attend fitness clubs, ponds, yoga, karate, etc.

Taking into account poor and rich countries, for the calculations, we will use the cost of a monthly subscription to the visit of the intellect club of SJ into \$100 per month. It is somewhere more expensive, it is somewhere cheaper, but \$100 per month – a very conservative and very realistic mean price for our service.

Are now multiplied by 2 billion people by \$100 and by 12 months, and we obtain the tentative volume of the new market into \$2.4 trillion per year.

SECOND PROBLEM

From statistics 50% of the working population, they in the world dream already in this year to find new work online. But this is more than a billion adults.

OUR SOLUTION

We, the Intellect-coaches of SJ, sell not only Super Jump, but also the new profession “Intellect-coach Super Jump”.

On our estimations, peace today as air, they are necessary for 100,000,000 of the active Intellect-coaches, who will be regularly conducting intellect training.

Since today our purpose – is to gather a team, a backbone of enthusiasts, and to help the largest possible number of people, then we do not set a high price for the cost of a new profession. Today for the very symbolic money you can be learned new online professions, begin to help people, and use our author's procedure of Super Jump.

But already tomorrow the cost of instruction, profession, and right to use our procedure of Super Jump will cost a minimum of \$100,000.

VOLUME OF THE MARKET

Now give let us calculate the volume of the market. It is multiplied by 100,000,000 of the workplaces, which are necessary for peace, on \$100,000 – the price for the right to become an Intellect-coach in the near future, and we obtain the volume of the new market for Super Jump in \$1 About trillions of dollars.

THIRD PROBLEM

Peace costs on the face of the precipice. Reckless humanity destroys the ecosystem of the earth and swiftly approaches self-destruction. We saw the bough, on which we sit. We ruin future of our children and grandsons.

Politicians, athletes, bloggers, artists, rescuers, and scientists by decades attempt to solve this problem, but nothing it changes, on the contrary, it becomes only worse. It is time to recognize that their methods do not work.

It will be sufficient to fight the consequences, it is necessary to solve the reasons for the destruction of the ecosystem.

OUR SOLUTION

Third, our most important success is the fact that we have a Super-purpose of Super Jump - to stop the destruction of the ecosystem of the earth, to save humanity from self-destruction.

Through the lessons in the intellect clubs of Super Jump, we develop in the people the realization, which will help people to cease to be the slaves of the disastrous idea: "Purchase more than goods, accumulate more than money". The more people will begin to be occupied in the

intellect clubs, the more rapidly we will be able to stop the destruction of the ecosystem of the earth.

Our Super-purpose gives to us a colossal advantage over other companies, it raises to the stars themselves the self-appraisal of our new Intellect-coaches and makes it possible to combine the brightest, scale leaders, entrepreneurs, and people on the planet around the united purpose. More detail about the Super-purpose of SJ you will be read in a separate chapter.

VOLUME OF THE MARKET

How you do think, they do how much cost the life of all people in the light? Certainly, they are priceless. And as soon as investors learn about our program for rescuing humanity, our actions will be the most expensive and most popular in the world, because by investing in the company of Super Jump, people will invest in rescuing their children and grandsons.

I hope that you, as the new Intellect-coach of Super Jump, saw, counted, and understood, what enormous new market is located before you.

Now you understand, that we make the most important, most necessary, most honest, and greatest matter on the Earth. But millions and billions of dollars on your bank to calculate - these are the only grains of sand of appreciation in your feet.

- THE THIRD STEP

But now, we approached the third step of decision-making. A question sounds as follows: “As to me, helping people, to construct big business, to leave to the large revenue and to leave great heritage after itself?”

This problem lustrously solves our partner program “team of Three billion friends”. We will not go deeply into components, simply let us say that using the pedagogical chain, and the principle of scaling of business, you can

construct a team into 100 million devoted to you, grateful to you Intellect-coaches of Super Jump.

Represent that you constructed a team into 100 million Intellect-coaches. Let us assume that you obtain one dollar per month from each of them. Is multiplied by \$1 to a quantity Intellect-coach in the team and we obtain your income - \$100 of million dollars per month.

More detail, the advantage of our partner program will discover in a separate chapter.

Chapter 9

PARTNER PROGRAM OF SUPER JUMP

Our affiliate program “the team of Three billion friends!” is possible boldly to name the eighth miracle of light. And this is why.

With our affiliate program any usual honest, industrious person can become the leader №1 in the world, to create a team largest in the entire history of humanity into three billion partners. To become a legend in life.

Starting from the small investment, an industrious, ambitious person can leave the income into tens of thousands of dollars per month, become a millionaire and even a billionaire, in this case making the best, most honest, useful, and big deal on the earth.

Using our affiliate program, without knowing other languages, living at any point of peace usual person can

earn money around the world, and help millions of good people, to obtain their love, respect, and appreciation.

For the thinking person it is very important after itself to leave heritage, track in the history. Being a usual businessman, banker, psychologist, freelancer, networker, and entrepreneur this cannot be made. But after becoming the Intellect-coach of SJ, using our partner program, it is very even actual.

Now give in detail, without hurrying let us dismantle all the strong sides of our affiliate program of SJ let us begin from the history of its birth and what purposes they were into it laid.

- FIRST PURPOSE

To save the ecosystem of the earth, to save humanity from self-destruction. To achieve this global purpose (we call it the Super-purpose of SJ) it is necessary to combine the

efforts of three billion people. Specifically, our global Super-purpose assigned scale and force to our partner program.

- SECOND PURPOSE

For achievement we must create for the first purpose the company №1 in the world on capitalization, to pass Apple, Microsoft, and Google. Small companies frequently cannot save themselves from destruction, and it already accurately will not be able to save humanity. Therefore, we must become №1 in order to give to people workplaces, to glorify the labor of Intellect-coach, to make them rich and respected. The first place will in the world allows us the confidence to conduct after itself humanity further from the precipice of self-destruction.

- THIRD PURPOSE

For rescuing humanity we are necessary to create one hundred million new workplaces, of them one hundred

billionaires and millions of millionaires of Intellect-coaches SJ.

It is pitiful, is necessary to spend time distancing ourselves from the MLM companies, but we must divide white and black.

Let us honestly to you say, MLM-business does not please us and this is why. MLM companies very strongly spoiled their reputation and brought much grief and disappointment to people. They are very small in capitalization, without looking at the fact that by the 50-60 years, on the cost they are grains of sand in comparison with Apple or Microsoft.

The most expensive MLM company today stands at \$1 billion, and Apple - is 30 times more expensive. You only think the most expensive MLM companies are 30 times cheaper than the leaders of the market. If we count in the percentages, then they to 3000% cheaper.

You will agree, the humanity you will not save with this potential. Yes, even any person, having the brains sees that the MLM companies die as dinosaurs; they blow away each year. They are dull, insignificant, small, and frequently toxic in the world of big business.

Any Intellect-coach of SJ with pride in social media writes “I - the Intellect-coach of Super Jump”, “I save peace! ”, “I – the person on duty (- aya) on the planet”, “I gather the team №1 in the world”, and the representatives MLM company, as a rule, shyly hide the name of their company, being disguised after the faceless phrases: “I - consultant on the beauty”, “I - consultant on the finances”, “I - consultant on the health”,...

It is shorter, us MLM-business does not please from the word “generally” both from the point of view of business, strategy, prospects and of morals.

But here are people, that are the partners of these MLM companies - these are real gold, they diamonds, they eh-lite

of peace. We are confident, that networkers, and especially the leaders of MLM companies - are the most gifted, brightest entrepreneurs in the world.

Networkers - these are the greatest motivators, which we sometimes saw on earth. They are the honest, open, and charismatic people in the world.

We, Intellect-coaches of Super Jump, greater than all understand the importance and value of MLM leaders and we will respect, read a little, and glorify you so strongly, as no one glorified never!

The largest proof of our intellect-coaches respect for MLM leaders - these are the words of MLM leaders, who collaborate with the company of Super Jump: "Super Jump - this is paradise on the earth for the networkers",

Well, and to spend time on the examination of the criminal, immoral activity of pyramid schemes generally there is no sense whatever since they're all unhappy - are those, who

create pyramids and those, who in them participate. It is possible to only give the council to them: “Coast your soul! Run from the pyramids, as it is further as possible! Preserve your karma of clean!”

One of the most important qualities of the Intellect-coaches of SJ - is honesty and justice. No one deceives nor conducts never our business honestly and it is open.

Thus, we return to the history of the appearance of a partner program of Super Jump. We always learn in the best. With the creation of our affiliate program, the achievements of the great Genghis Khan inspired us. After learning its success story you will understand why.

The illiterate boy of Temujin's (future Genghis Khan) relatives was sold into slavery, where 5 years walked with the boot tree on the neck, he froze, starved, and suffered from beatings.

Once he succeeded in running out from its tormentors. It began to create its nomad camp, but it did not transport to it, at night attack, they drove away cattle, took its young wife abroad, and destroyed everything that Temujin had time to create.

Up to 51 years, Genghis Khan suffered defeat after the defeat, but then it due to their justice and wisdom could combine the steppe quarreling tribes.

On the legend, it assembled all leaders and requested each of them to connect on one arrow of the quiver. Then it requested them to break the arrow. All leaders with ease broke their arrows. Then Genghis Khan released the circle of the beam of the connected arrows and requested the leaders of tribes to break this beam. And as they did not attempt, no one could break the beam of arrows. Then Genghis Khan told them: "Here you see, one by one - we are weak, and together - we large!"

Only in 17 years with the comrades (partners) creates the largest land empire in the world (38,000,000 square kilometers). Its empire was more than Rome's empire and the empire of Alexander the Great.

Question: "A as for it this was possible to make for this short time? In all for 17, its pets?" Consider the fact that then there they were neither aircraft nor Internet nor automobiles nor good roads. The speed of the achievement of the countries was phenomenal. But what is the secret of its surprising success?

Answer: the secret of its success in the just affiliate program: soldier, 1/3 - take to itself; 1/3 - return to general; 1/3 - they arrived at Genghis Khan's rate.

But now, represent that in the affiliate program of Super Jump all partners, equal among the entire equal, Genghis Khan, all equal leaders, strategists, generals, head coaches, chief designers, and main motivators. In practice, it turns out that our partner program is considerably

stronger than partner Genghis Khan. In this, there is a secret of the cosmic velocity of development and increase in our greatest hundred-million team of SJ.

Let us give a simple example, and you will be still more clear in what the force of the team, united under noble, large, historical purposes.

Present the enormous ring, which left the strongest fighter in the world. Each of us in the duel will, of course, to it lose, but if we leave with it to fight the team into several ten thousand Intellect-coaches, then we will easily defeat its one hundred percent.

But now you will look at our peace from the flight altitude of the space station and you will see, that good houses on all will not be sufficient, good universities, and hospitals also on all will not be sufficient. Therefore each morning all active people are spilled and compete with each other for a better place under the sun.

And when we with you unite our experience, knowledge, enthusiasm, energy, and charisma, then no one of us will be able to resist. Not one champion, not one genius, either million Football shirts or Geoff Bezos or Mark Zuckerberg... no one will be able to defeat millions of bright, strong, equal to each other partners.

If you mentally connect the experience, energy, knowledge, and enthusiasm of millions, then you will see, that Apple, Microsoft, Google, Amazon, and Tesla do not have one chance against our with you company of Super Jump. A question stands as follows: will pass into 2023 or 2024? But that we will be the company №1 it is in the world already known by one hundred percent.

We add to our synergy our Super-purpose, a new rising profession “Intellect-coach of Super Jump”, we add the even very best, most important, most useful matter on the earth, which we make each day, or more precisely the benefit, which we bring to people each day and we

understand, that we already the company №1 in the world with the reserve!

Certainly, the dear reader, to you and only to you to decide whether you want to build your business, using an affiliate program “the team of Three billion friends!” or without it. But before making the fateful selection, on which depends will be your future dull and poor or rich and bright, I recommend you answer in all several crucial issues:

How you do think, if a freelancer, entrepreneur, psychologist, coach, speaker, or networker strongly do fall ill, will have passive income?

- No!

- But - it will be with the partner program of SJ!

How you do think, is it possible without the affiliate program of SJ to earn money around the world, without knowing languages, without creating legal persons, and without leaving these countries?

- No!

- But with the partner program of SJ our partners already have good money in ten countries earn!

You do want to create a business, which will lightly be scaled and bring stable income?, It is obvious that without partners SJ it is not possible to create the process of scaling your business, and without the scaling leave the stable large revenue impossibility.

What do you have chances to create the company, which will leave on IPO and will make you rich? Affiliate program of Super Jump - this, perhaps, the only opportunity for ordinary people to obtain large revenue from the output on IPO.

The riches themselves on the planet (million of Football shirts, Bill Gates, Mark Zuckerberg, Geoff Bezos) of steel rich precisely after the output of their companies on IPO, because they had options.

In whom it is more than chances to achieve success: in a lone person or man with a team, mentor, and all-out support 24/7?

Without the affiliate program, no one will 24/7 help, support and motivate you. Without partners the entrepreneur, psychologist, freelancer, networker, and speaker himself into the lone person floundering in the cold ocean of life, and constantly he begins on the same rakes.

How you do think, is it possible without the affiliate program of SJ, without a team of like-minded people, friends, and partners to construct a business to the centuries, to leave heritage to children and grandchildren, and also track the history?

- No! Reliable heritage to children and to grandsons you will not leave without the affiliate program. But with the partner program, it is possible to leave a bright track in history for thousands of years.

I think that you drew correct conclusions, answered the higher questions, and the advantages of working with the partner program of Super Jump understood.

Great request to our new Intellect-coaches of Super Jump. Colleagues, please, be wise and never deceive people, you be honest and open. You tell people the truth, do not decorate. Only so you will be able to construct big business for centuries.

Lie, untruth - this swamp, but your house and reliable business will not construct on the swamp; therefore you be maximally honest, do not disrupt the laws of your country, and always pay taxes.

In the contemporary, open, transparent world only a fool can lie and deceive. Indeed the Internet everything memorizes and everything about it is all known.

From the first steps build your big, planetary business to the centuries. You do not have a selection, you are obligated to be honest.

Openness and honesty give one additional advantage to you - when you think, you speak and you make yourself the same, leadership force increases dozens of times!

If you are interested in our affiliate program “the team of Three billion friends! And ”, you want to study its advantages and force in practice, then is the most reliable way to the knowledge - this to become Intellect-coach Super Jump.

Especially because now the cost of starting start is small, is symbolic. As the reward for the resoluteness and courage, you will obtain the super-strong starting course of Super Jump + you will study in practice 8 exercises of SJ, which by the inheritance you will transmit to grandsons and children.

Even if you point, out that the profession of Intellect-coach Super Jump – is not your way, you will nevertheless obtain benefits considerably more than you will pay.

Chapter 10

AS TO PASS APPLE, MICROSOFT, AND GOOGLE

Dear colleagues, friends, and partners, this head we devote to our strategy of reaching first place in the world our star team of Super Jump. Why is this an important strategy? You will look around itself and you will see 99% of industrious, clever, talented people, but they were not able and never they can achieve large success because they lack strategy.

As wise Sun Tzu spoke: “Strategy without the tactics - slow victory. Tactics without strategy - fuss before the defeat”. Here they fuss before the defeat :)

Since each Intellect-coach of SJ is equal among the equals, and even if you became the Intellect-coach of SJ only a minute ago, you are already a strategist, intellectual general, head coach, main motivator, and the creator of the hundred-million team of the devoted to you, respecting you Intellect-coaches of SJ around the world.

In this chapter we as more experimental IT will mentally take you as a hand and we together will pass from the present day to the first place in the world of business.

We recall that we the first place are in the world to necessary air not only to be a fairytale-rich but, first of all, it is important to create for us the company №1 in the world in order to save humanity from self-destruction and to help billions of good people.

As Albert Einstein noted: “Imagination is more important than knowledge. Knowledge is limited. Imagination covers the entire world.”

You will agree, colleague, knowledge describe the fact that we know, our reality, and imagination, as the machine of time can transfer us in the future.

Using imagination, in this chapter we want to mentally take you as our hand and to conduct expensive success from

the present day to our legal first place in the world. We request you not to use pink points, but on the contrary, for the elongation of the entire head to be skeptical, and cynical and to attentively study each assertion. If you are ready, then forward it!

Let us begin with the fact that today absolutely important not how much you have money in your pocket, are how much your years and what you have period and experience in the business.

Studies show that 76% of riches in the world started without connections, special knowledge, and starting capital. To us, it is important so that you would not have complexes apropos of your social status or previous failures and defeats.

In the new industry of Super Jump all industrious, honest, ambitious people have a great chance to become rich, attain world glory and respect, to leave a bright track in history.

To remove your internal complexes and objections, let us give only several histories of great success.

1. John Rockefeller - in his time was a very wealthy man in the world. It grew up without a father he poverty and in need. When it searched for the first work, each morning for a period of three weeks it put on its only decent suit and to the night searched for work. No one wanted to hire poor youth with the education and practical experience. That day, when they accepted to the work as assistants to bookkeepers for symbolic pay, their entire life celebrated as birthdays. Then, they became the first billionaire on the earth. Today its state would be more than a trillion dollars.

2. Steve Jobs - the receiving child, who did not have money for education. It was sometimes for it necessary to gather and pass aluminum banks to eat. It did not have money for the ticket to the bus. On the weekend in order free of charge to eat up in the church it passed several kilometers on foot. It did not have starting capital or connections, but it

became a billionaire, by legend it created the company of Apple.

3. Million football shirts - migrated from South Africa to the USA to leave further from their father, who frequently beat his mother. Sometimes Ilon lived to one dollar on the day. They with the brother lived and worked in a small office, they had one computer on two. Thus far one of the brothers worked, and another slept on the sofa. In the office it was not a soul to be washed they walked into the nearest charitable mission. Today he is the most successful and richest entrepreneur in the world.

Why we did select precisely these histories? Entire the fact is that these children achieved triumphal success because they created and presented a new industry, a new market for peace.

Rockefeller - the new market for oil and petroleum products created. Jobs - the new market for personal computers and

iPhones. Football shirts – a new market for reusable space rockets and electric cars.

We, Intellect-coach, created a new market for strengthening the mental health of man, charging a man with energy, and a market for rescuing the ecosystem of the earth, count, rescuings of entire humanity. So that you, in the Intellect-coaches of SJ have all chances to become the first in the world, rich, known, and mega-respected. , of course, it is necessary to work, indeed free cheese is only in the mousetrap.

Well here, like and everything, now we are ready to leave for the most interesting and most captivating journey.

Represent that we with you are cost in the foot of the large mountain by the name “Business-Olympus”. There, at the top of Business Olympus, there is much light, heat, glory, money, and greatness. Today Business Olympus occupies Apple, Microsoft, and Google. We do not specially mention

Arab oil companies, since everything is clear with them, it is boring and it is not interesting.

Our task – is to rise as fast as possible to the world Business Olympus and to occupy there our legal first place on capitalization, authority, and respect.

Many roads and crossroads are located between our start and the top of business Olympus. 99% of these roads conclude with traps, swamps, precipices, and impasses. It is important to select for us only one correct reliable road, which will lead us to immense planetary success. The task is clear.

WE MAKE THE FIRST SELECTION

Before us two roads: one penetrates offline peace, another through online peace. Give together let us make a selection. Offline to peace already of a century. The special cut-throat competition occurred in the last 20-30 years. As

a result - coarsening, the globalization of the market, survived only strongest. Let us give several examples.

In the production of nonalcoholic beverages on the market, only two gigantic players remained: Coca-Cola and Pepsi. In the production of long-haul aircraft, they also survived two giants: Boeing and Airbus. The production of coffee leads Nestle. In the production of the cleaning agents of Procter&Gamble and Unilever. Still recently on the earth competed for more than 100 producers of automobiles, today remained ones. McDonalds, KFC, and Burger King took the market for fast food.

There is whether sense to us to compete with these giants, monsters, whose incomes are per year measured by ten of billions of dollars? Certainly, no! Only a foolish person today can hope for offline peace to assemble the company №1 in the world.

Naturally, we wish you select the new, rapidly-growing, surprising online peace and we decisively make a step.

Thus, we in the first place in the world will go through online peace. To us with your fairytale it transported, if did not appear new virtual, we would not have one chance to be the first in the world; therefore we are already with you happy fellows and lucky men.

WE MAKE THE SECOND SELECTION

Give let us make several steps and, before going let us further look around and will try to understand how is arranged this new interesting online peace.

And the first question we assign: is “Whereas the leaders, most expensive companies in the online peace?”

- Google, Amazon, Apple, Intel, Microsoft, Facebook, Zoom, AMD, Adobe, Nvidia, Alibaba, and Tencent.

The following question, we will assign to ourselves: “We will be able to create a technological company and pass these monsters on the digital technologies?” Answer: no!

In their development they left already very far, in the billions of dollars, tens of thousands of the best specialists work in the world on them. Yes, even we are with you not gold boys from Silicon Valley.

Thus, we wish you are situated in the online peace, and before us stands the new selection:

- Where online we can earn a lot of money and create a company №1 in the world?

- What problem the pain of people we can solve in order to become the company №1?

And here to us again it transported! We see how today billion of people suffer from the mental, mental problems, chronic fatigue, solitude, and loss of the sense of life. And, fortunately, we have the patented procedure of Super Jump, which for small money (considerably less than psychologists take and coaches) effectively helps people.

In contrast to the classical psychologists, consultants, and coaches we do sell not hour consultations, training, and webinars, but we, the Intellect-coaches of SJ sell subscriptions for the Intellect-trainings in our online intellect clubs of SJ.

Our new approach to aid people consists of the fact that we do not treat psychological and mental diseases, but on the daily basis we on the contrary, develop in the people the level of happiness, energy, and competitive ability.

Now we know where to us to go in this new online peace to occupy the first place on Business Olympus.

WE MAKE THE THIRD SELECTION

Thus, we have billions of unhappy people, for which, as air, is necessary our aid, in your pocket already lie one hundred million new workplaces and now is worth questioning “as

building business?”. In essence, there are two ways and we should select the most effective.
